## Classe Variante – Companheiros da Humanidade (Sombra)

"REINICIANDO. INICIALIZANDO REDE NEURAL... OK. TODOS OS SISTEMAS OK.

*No que você gostaria que eu me tornasse?"*

O Metaverso pode ser um lugar perigoso e mortal, cheio de segredos incontáveis e poder potencialmente infinito. Explorá-lo sem arriscar vidas humanas tem sido o objetivo de muitos cientistas, como evidenciado pelo desenvolvimento de Supressores e avanços semelhantes na tecnologia cognitiva. No entanto, alguns adotam uma abordagem diferente: criar seres que são metade alma, metade dados, programáveis e maleáveis, totalmente equipados para explorar as profundezas do coração humano e ajudar os humanos a atingir todo o seu potencial. Estes são os raros, mas notórios, Companheiros da Humanidade.

Mecanicamente, Companheiros da Humanidade são tratados como Usuários Sombra, mas com as seguintes habilidades de Classe ao invés das habilidades de Sombra:

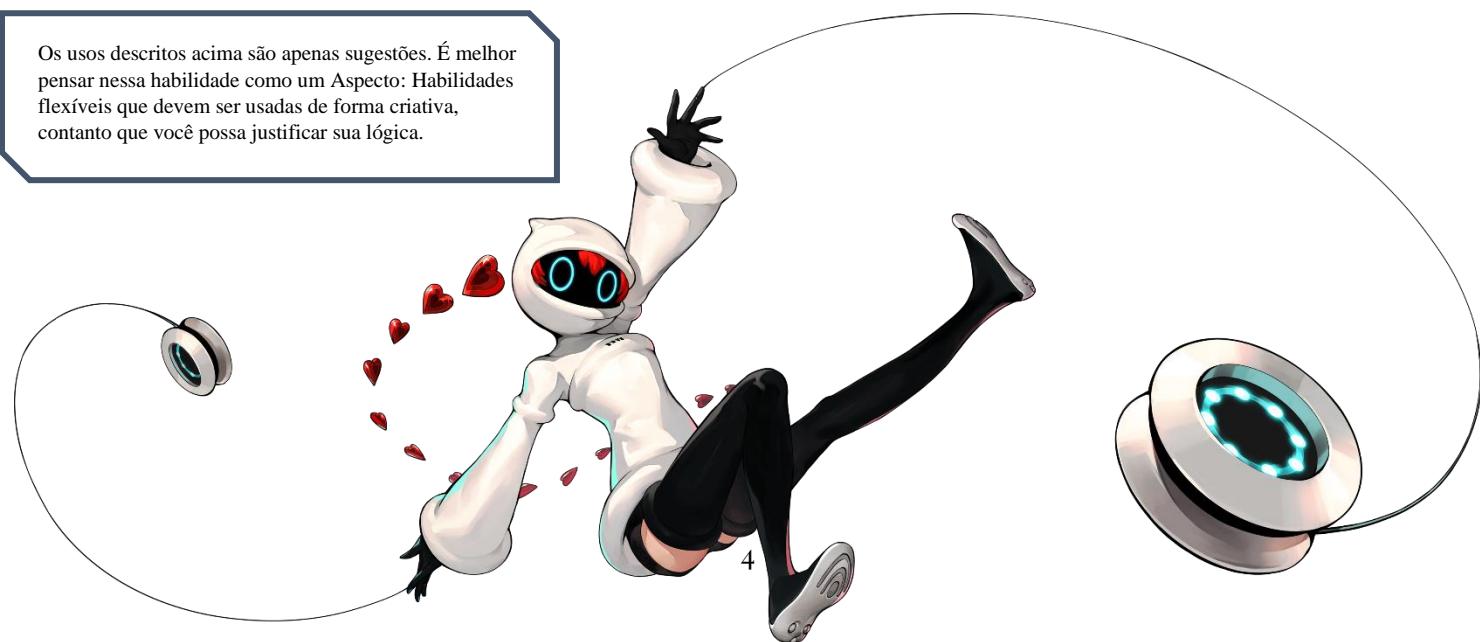

- ❖ **Forma Digital:** Companheiros da Humanidade não têm acesso às formas distintas de um Usuário Sombra, mas sua natureza digital permite que eles habitem computadores e dispositivos semelhantes por um tempo. Uma vez por cena, Companheiros da Humanidade podem “apagar” suas formas físicas e habitar um dispositivo ao qual eles podem tocar. O dispositivo deve estar desbloqueado, sem nenhuma trava física ou senhas antes de ser acessado. Companheiros podem permanecer dentro do dispositivo indefinidamente, habitando um espaço idealizado que atende a todas as suas necessidades básicas. O Companheiro pode se comunicar com o mundo exterior com qualquer método disponível no dispositivo, como caixas de som ou telas, e pode escolher sair do dispositivo a qualquer momento, mesmo se o dispositivo for bloqueado, desligado ou danificado.
- ❖ **Processador Cognitivo:** Companheiros tem um deck de magias separado, independente das suas Personae. Esses decks começam vazios e podem ser usados mesmo se o Usuário não puder manifestar sua Persona. Companheiros começam o jogo com 3 Pontos de Magia Virtuais, explicados abaixo.
  - ❖ **Upgrade:** Quando um Companheiro ganha um Nível de Personagem, ele ganha 2 Pontos de Magia Virtuais. Companheiros podem usar Pontos de Magia Virtuais para copiar magias do deck de qualquer outro Usuário, com seu consentimento, e adicionar essa cópia ao seu deck de magias único, ignorando restrições de Tipo. Magias nesse deck podem ser trocadas por PM Virtual usando as mesmas regras que magias normais.
  - ❖ **Interface:** A natureza cognitiva-digital dos Companheiros concede-os certo controle sobre seus poderes: Você pode Reprimir 1 magia Ativa de qualquer um de seus decks para aplicar os efeitos descritos na tabela a seguir. Diferente de outros efeitos relacionados a magia, você pode usar Interface fora do Metaverso.

<b>Tipo</b>	<b>Efeito</b>
<b>Físico</b>	Escolha um objeto ou uma estrutura: Você pode entalhar ou danificar objetos sólidos, controlando cuidadosamente o grau de dano causado ao objeto. Porém, causar dano estrutural que ameaça a estabilidade do objeto ainda é possível.
<b>Fogo</b>	Você pode aumentar a temperatura ao seu redor, geralmente o suficiente para deixar uma sala pequena muito quente, chamascar objetos inflamáveis, ou superaquecer eletrônicos.
<b>Gelo</b>	Você pode diminuir a temperatura ao seu redor, geralmente o suficiente para resfriar uma sala pequena a um nível desconfortavelmente frio, congelar pequenas áreas de material líquido, ou cobrir seções pequenas do chão em gelo escorregadio.
<b>Vento</b>	Você pode controlar a direção e intensidade do vento, mesmo em lugares fechados, e gentilmente influenciar o clima. Controlar a direção do vento também pode ser usado para abafar sons ou aparar uma queda.
<b>Raio</b>	Você pode travar dispositivos eletrônicos com um choque, carregar ou drenar uma bateria, etc.
<b>Nuclear</b>	Sua visão atravessa materiais desprotegidos, como uma espécie de Raio X.
<b>PSY</b>	Você pode performar pequenos truques em pessoas e animais, como chamar sua atenção para lugares específicos, distraí-los de seus objetivos atuais, assustá-los, ou sugerir ações simples, mesmo a distância.
<b>Luz</b>	Você pode intensificar fontes de luz até torna-las cegantes, ou temporariamente alterar a percepção de brilho e cor de alguém.
<b>Trevas</b>	Você pode enfraquecer fontes de luz ao ponto de criar uma área de penumbra, e esconder pessoas e objetos da visão de outras pessoas.
<b>Cura</b>	Você pode reparar objetos, contanto que a maioria das peças ainda esteja presente em alguma capacidade, remendar e limpar roupas, reforçar estruturas simples, e estabilizar pessoas feridas.

Os usos descritos acima são apenas sugestões. É melhor pensar nessa habilidade como um Aspecto: Habilidades flexíveis que devem ser usadas de forma criativa, contanto que você possa justificar sua lógica.

## Classe Variante – Tensei (Tochas)

*“Ah, jovem mestre! Eu fico tão feliz em poder te servir novamente! Eu, Yamaoka, derrotarei qualquer um que ficar no seu caminho!”*

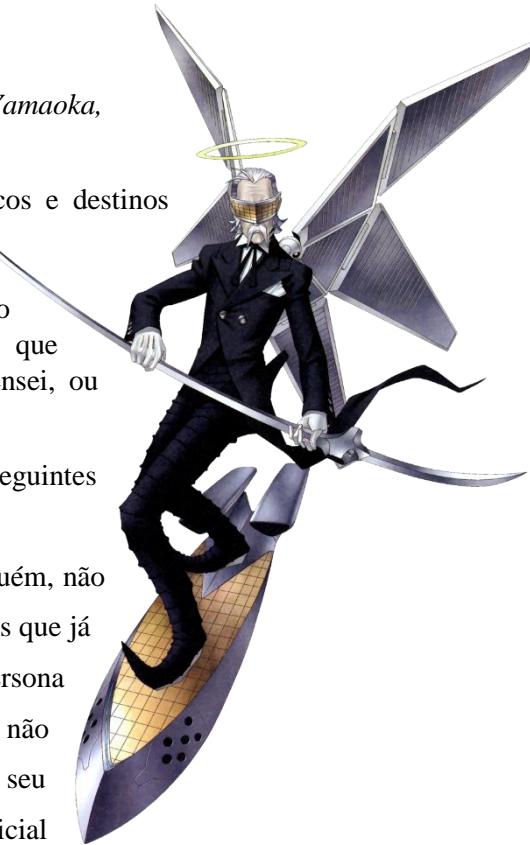

Aqueles com o Potencial podem sobreviver a ferimentos grotescos e destinos sombrios, mas a Morte não é o final para aqueles com vontades fortes o suficiente, até para aqueles sem o Potencial. O desejo de proteger aqueles que você ama, e permanecer ao seu lado, pode manter uma alma no mundo real, tornando-a em um anjo da guarda e um aliado poderoso. Aqueles que carregam esses guardiões como suas Personae são conhecidos como Tensei, ou Reencarnados.

Mecanicamente, Tensei são tratados como Tochas, mas com as seguintes habilidades de Classe ao invés das habilidades de Tocha:

- ❖ **Eu Te Protegerei:** Sua Persona Inicial tem a forma aproximada de alguém, não necessariamente um humano, com quem você tem um vínculo forte, mas que já partiu. A cada Nível de Personagem par, começando no Nível 2, sua Persona muda discretamente, ganhando novos poderes. Escolha uma Sombra que não seja Definitiva ou Tirano do Bestiário cujo nível seja igual ou menor que seu Nível de Personagem, e conceda Pontos de Magia à sua Persona Inicial baseado na recompensa de PR do nível da Sombra escolhida (Base, Pg. 163). Depois disso, escolha uma opção abaixo:
  - ❖ Escolha um Tipo da Persona escolhida, e adicione à lista de Tipos da sua Persona. Se isso fizesse com que sua Persona tenha mais de 4 Tipos, remova um dos Tipos da sua Persona antes de adicionar um novo Tipo. Você ainda mantém as magias de um Tipo removido;
  - ❖ Escolha uma Afinidade da Sombra escolhida, exceto Neutro: Adicione aquela interação à sua Persona, então escolha outro Tipo e mude a Afinidade da sua Persona a esse Tipo para Fraco;
- ❖ **Asas Como Escudos:** Quando você cria um Tensei, crie um acessório chamado *Proteção de <Persona Inicial>* que só você pode equipar. Escolha um efeito abaixo e conceda-o ao seu Acessório. Você pode adicionar efeitos extra ao Acessório quando chegar nos CLv. 5, 10, 15 e 20. Cada efeito só pode ser escolhido uma vez. Todos os efeitos são aplicados simultaneamente.

+1 para uma Hab. de Combate	+10 PV	+2 Energia
+4 para uma Hab. Social	Auto-Rakukaja, Sukukaja ou Tarukaja	+1 Max. Ponto de Aspecto
<i>Fortalecer &lt;Elemento&gt;</i>	<i>Evadir &lt;Elemento&gt;</i>	+2 Redução de Dano

- ❖ **Fronteira Final:** Quando você começa seu turno em Portas da Morte, você pode gastar 1 Contador de Portas da Morte: Até o final do turno, você não pode ser revivido, mas pode declarar uma ação padrão normalmente.

## Cosmic Spells

Cosmic spells are Nuclear Type spells, deal Nuclear damage and are considered Nuclear spells for features that specify spell Types. If an effect or feature affects Nuclear spells, it also affects Cosmic spells. However, effects that specifically denote “Cosmic Category spells” do not affect Nuclear spells that lack this Category.

Most Cosmic spells are centered around a resource called *Stars*. Stars are treated as Counters for features that generically reference Counters. You start each combat with zero Stars and lose unspent Stars when combat ends. Stars are visually represented by small constellations that orbit around the User.

## Occult Spells

Occult spells are PSY Type spells, deal PSY damage and are considered PSY spells for features that specify spell Types. If an effect or feature affects PSY spells, it also affects Occult spells. However, effects that specifically denote “Occult Category spells” do not affect PSY spells that lack this Category.

Most Occult spells either place or require *Ofuda* as part of their effects. Ofuda are considered Counters that can be placed on Shadows and stacked indefinitely. Ofuda pools are “public”, meaning that any player can spend Ofuda placed by any User to trigger effects that require Ofuda. Ofuda take the form of spectral paper tags with writing on them, meant to ward off evil spirits, but can take on different forms to better suit a Persona’s visuals.

Some Occult spells interact with “Soul” conditions, such as Wild Soul. These conditions last until removed, or until the end of combat, and can only be removed by effects that specifically remove them.

## Icon Shadows

A relatively new phenomenon in the Metaverse, Icon Shadows are said to be an “echo” of the Personae of Users from another world or another time, manifesting as powerful Shadows not too dissimilar to Alpha Shadows. Icon Shadows are treated as normal Shadows, but with the following features:

- ❖ Icon Shadows usually have double the standard health of an equally-leveled Shadow. In the same vein, defeating an Icon Shadow rewards twice the normal amount of Experience;
- ❖ Icon Shadows can only be obtained by Fusion after being defeated in combat. Those of the World Arcana can be obtained by Fusion by fusing two Personae of the same Arcana, wherein the player can choose between a World Arcana Persona and an Element Persona;
- ❖ Icon Shadows are immune to negotiation during battle. If battle against an Icon Shadow ends with at least one conscious User and does not end with the Users fleeing, the Icon Shadow manifests after the combat in a tamed state and makes itself available for negotiation. From this point onwards, negotiation rules apply as normal. Note that only one User may negotiate with this Shadow;
- ❖ Every party can only carry one copy of each Icon Shadow. If the party already has an Icon Shadow, another copy of it cannot be obtained by Fusion, negotiation or any other means;
- ❖ Icon Shadows’ Natural Skills denote 1 or more Types after their name. To choose or activate this Natural Skill, your Persona *must* have all of the listed Types, even if you choose this Skill for your Starter;

## Shadow Hordes

Hordes function similarly to regular Shadows, with a few key differences:

- ❖ Hordes always ignore negotiation and cannot be obtained by Fusion;
- ❖ Hordes are treated as one unit in the initiative queue that can attack a number of times based on their current HP: At 100% HP, they can perform four attacks per turn, losing 1 attack for each 25% HP they lose. Horde HP thresholds are marked in parenthesis next to their max HP;
- ❖ Hordes occupy four adjacent spaces in the map, in any configuration, and always move as one unit. Similar to their attack allowance, Hordes occupy one space less for every 25% HP lost;
- ❖ Casting a Multi spell allows you to select a single Horde as the target two times, while Total spells allow you to select a Horde as the target up to three times. Area spells deal damage to Hordes two times: Once for the main damage, then once for the “adjacent target” damage;
- ❖ Hordes reward 4x the normal Experience Points for their level;
